## A fast-frequency portrayal of living standards of Indian households

### People of India<sub>dx</sub>

The People of India database provides a moving kaleidoscope of the attributes and peculiarities of the Indian people.

### Aspirational India<sub>dx</sub>

Explore household assets and amenities, household sentiments, their perceptions and decisions regarding purchase of assets or to make investments.

### Income Pyramids<sub>dx</sub>

Enables the study of seasonality of household incomes, volatility of incomes, growth in incomes, changing composition of household incomes and a lot more.

### Consumption Pyramids<sub>dx</sub>

Consumption Pyramids fills a serious gap in the official Indian statistical system. It delivers fast-frequency data on consumption expenditure of households.

# Consumer Pyramids Household Survey

The Primary Sampling Units (PSUs) were the villages and towns of the 2011 Census.

The Ultimate Sampling Units (USUs) were the households from these PSUs.

Table 4: Summary of size distribution of sample households per stratum

A Homogeneous Region is a set of neighbouring districts within a state that has similar agro-climatic conditions, relatively similar urbanisation levels and relatively similar female literacy and are of a similar size in terms of households as per the 2011 Census.

Description	No of households				
	Rural HR	VL Towns	L Towns	M Towns	S Towns
Average	634	699	416	356	308
Median	624	576	324	320	320
Q1	512	454	313	305	301
